Art Unit: 3728

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 20-27 and 38-47, drawn to a shoe or combination of shoes with a beveled heel and projection, classified in class 36, subclass 8.3.
 - II. Claims 56-64, drawn to a shoe with a beveled heel and a specific lacing hole and lacing arrangement, classified in class 36, subclass 50.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of group I and group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention beveled heel shoe has separate utility such as with any type of closure mechanism such as a hook and loop closure, buckle, elastic, etc. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
6. This application contains claims directed to the following patentably distinct species of the claimed invention:

Art Unit: 3728

If applicant elects group I above, the following species election is required:

- A. The heel as shown in figures 1-3.
- B. The heel as shown in figures 4 and 5.
- C. The heel as shown in figures 6 and 7.
- D. The heel as shown in figures 8 and 9.
- E. The heel as shown in figures 10 and 11.
- F. The heel as shown in figures 12 and 13.
- G. The heel as shown in figures 14 and 15.
- H. The heel as shown in figures 16 and 17.
- I. The heel as shown in figures 18 and 19.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 20 and 21 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marie Patterson whose telephone number is 703-308-0069. The examiner can normally be reached on M-Th 6:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on 703-308-. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
